A SURE CURE FOR CROUP

Twenty-five Years' Contant Use With out a Failure

The first indication of croup is hoarse ess, and in a child subject to that disness, and in a child subject to that dis-ease it may be taken as a sure sign of the approach of an attack. Following this hoarseness is a peculiarrough cough. If Chamberlain's Cough Remedy is given as soon as the child becomes hoarse, or even after the croupy cough appears, it will prevent the astack. It is used in many thousands of homes in this broad land and never disappoints the anxious mothers. We have yet to learn of a single instance in which it has not proved effectual. No other preparation can show such a record—twenty-five years' contant use without a failure. For sale by the Tombstone DrugiStore
